Ballentine has the merit of writing a textbook (controversial because of the refutation of the standard Copenhagen interpretation (von Neumann's collapse postulate)) that will forever stand alone among the rest of the books on quantum mechanics.

Leslie Ballentine promoted the ensemble interpretation in his book Quantum Mechanics, A Modern Development. In it, he described what he called the "Watched Pot Experiment". His argument was that, under certain circumstances, a repeatedly measured system, such as an

Ballentine is one of the few quantum physicist that defend the ensemble

interpretation of QM so he write this book accordingly. As in the previous edition the author takes its time in explaining why he adopts some postures contrasting this with more orthodox point of views.
