...

The numbers get bigger and converge around 2.718. Hey... wait a minute... that looks like  $e$ ! Yowza. In geeky math terms,  $e$  is defined to be that rate of growth if we continually compound 100% return on smaller and smaller time periods. This limit appears to converge, and there are proofs to that effect. But as you can see, as we take finer time periods the total return stays around 2.718.

Conceptual Framework. Most research reports cast the problem statement within the context of a conceptual or theoretical framework. 4 A description of this framework contributes to a research report in at least two ways because it (1) identifies research variables, and (2) clarifies relationships among the variables. Linked to the problem ...
