The goal of evidence-based medicine (EBM) is “the integration of best research evidence with clinical expertise and patient values” [14]. By analogy, we suggest that the goal of evidence-based software engineering (EBSE) should be: to provide the means by which current best evidence from research

A decade ago, Kitchenham, Dybå and Jørgensen coined the term and provided the foundations for evidence-based software engineering (EBSE). A trilogy of papers was written for researchers [1], practitioners [2], and educators [3].
