1. Overview 1.1 Historical Considerations. Developmental biology is the science that investigates how a variety of interacting processes generate an organism's heterogeneous shapes, size, and structural features that arise on the trajectory from embryo to adult, or more generally throughout a life cycle (Love 2008; Minelli 2011a).

Developmental Biology (Stanford Encyclopedia of Philosophy)

Publications by George Church & colleagues. (Skip to Patents).(Skip to Papers in prep).Click on titles for full text pdf files (for fair use) or click on the literature citation for pubmed abstract and journal links.Jump down to patents (Lab members names are in bold font. Suffix "s" on numbers means submitted, but not yet published.Suffix "a" means additional publications from the lab).

Background As core units of organ tissues, cells of various types play their harmonious rhythms to maintain the homeostasis of the human body. It is essential to identify the characteristics of cells in human organs and their regulatory networks for understanding the biological mechanisms related to health and disease. However, a systematic and comprehensive single-cell transcriptional profile ...

Notice Concerning the Supreme Court's Decision in Vance v. Ball State University, 133 S. Ct. 2434 (2013) The standard for employer liability for hostile work environment harassment depends typically on whether or not the harasser is the victim's supervisor. An employer is vicariously liable for a hostile work environment created by a supervisor.

Section 15 Race and Color Discrimination | U.S. Equal ...

Introduction. In recent years, single-cell RNA sequencing (scRNA-seq) has significantly advanced our knowledge of biological systems. We have been able to both study the cellular heterogeneity of zebrafish, frogs and planaria (Briggs et al, 2018; Plass et al, 2018; Wagner et al, 2018) and discover previously obscured cellular populations (Montoro et al, 2018; Plasschaert et al, 2018).

Current best practices in single-cell RNA-seq analysis: a ...

1. Introduction. Coronavirus Disease 2019 (COVID-19) is a respiratory infection caused by a novel coronavirus, Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2 [])A minimum of 2.6 million new COVID-19 patients have been reported globally in the first days of March 2021 with 63,000 new deaths [].It should be noted that currently, only symptomatic cases of COVID-19 are being ...
