Step 1: Unlock the car. Sometimes an alarm will deactivate when you try manually locking and unlocking the car. When the vehicle notices that the key has been inserted into the lock, the alarm may shut off. Step 2: Start the car. You may also try turning the car on to reset the alarm. Step 3: Use key to lock and unlock.

How to Reset a Car Alarm | YourMechanic Advice

The Sigma S Series is designed to work independently as a full remote control system linked to the vehicle's central door locking, or to interface with the manufacturer's pre-installed remote locking system. All models are manufactured to the highest European certification standards, including Thatcham approval for the appropriate insurance-approved systems.

Hi, I have a Seat Ibiza which has a Sigma alarm. When I bought the car there was no alarm manual with it. Was working fine until yesterday then just stopped working inasmuch as I am unable to disarm it. Desperately need to be able to shut it up as neighbours ready to lynch me by now. Have been advised that just disconnecting from battery is not an ideal cure.

Sigma car alarm problem? | Yahoo Answers

Sigma Car Alarms The Sigma S30 Thatcham Cat 1 ... Manual arm, using the radio key (or programmable auto arm, which automatically arms the system 60 seconds after the last door is shut - adjustable between 1 and 99 seconds. Auto arm can also be programmed to lock the vehicle if required)

Sigma Car Alarms | Car Alarms Essex

The link takes you to the Scorpion website of which Sigma is part and there is a 'contact us' button. The only reference I saw for AC11 in a quick look is for the remote control which seems to apply to several different alaarm systems so maybe your actual alarm system has another reference or number, and for that you would have to locate the alarm's electronic box to see what is written on it.
