different parts of the globe, and included a diverse range of taxa. At least eleven separate regions of the Old and New World were involved as independent centers of origin.

History of agriculture - Wikipedia

During its brief history, agriculture has radically transformed human societies and fueled a global population that has grown from 4 million to 7 billion since 10,000 BCE, and is still growing. 3 The road to the present has not been smooth.

History of Agriculture - Food Production - Food System ...

Agriculture enabled people to produce surplus food. They could use this extra food when crops failed or trade it for other goods. Food surpluses allowed people to work at other tasks unrelated to farming. Agriculture kept formerly nomadic people near their fields and led to the development of permanent villages. These became linked through

The Social History of Agriculture; From the Origins to the ...

The first agriculture appears to have developed at the closing of the last Pleistocene glacial period, or Ice Age (about 11,700 years ago). At that time temperatures warmed, glaciers melted, sea levels rose, and ecosystems throughout the world reorganized. The changes were more dramatic in temperate regions than in the tropics.

agriculture and domestication ...

Agriculture is an important source of livelihood in most parts of the world. It involves tough work but it contributes to food security and health of the nation. Before the industrial revolution, agriculture was the primary source of economy. In spite of many commercial options coming up, many rely on agriculture for their income.

15 Reasons on Why is Agriculture Important in Everyday Life

The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers began to plant them around 11,500 years ago. Pigs, sheep and cattle were domesticated over 10,000 years ago. Plants were independently cultivated in at least 11 regions of the world.
